Microdermabrasian

Renuka Hair & Beauty

Phone: +61 7 3701 5600

What Can It do For Me?

- Treats aging & sun damaged skin.
- Treats scarring
- Treats skin pigmentation marks.
- Stretch mark minimisation
- Treats lips & character lines
- Treats enlarged pores
- Makes your skin smooth and silky.

How Does It Work?

Diamond Microdermabrasian is at the cutting edge of technology, and a fast growing trend in beauty. Its appearance enables beauty industry's radiating a kind of new vigor. It exfoliates your skin by utilising a multi-degree diamond tipped wand through continuous scrubbing and vacuuming the top most layer of skin, it makes old and damaged skin break away automatically, and stimulating the growth of new skin, increase blood circulation and promote the growth of collagen. Combining this procedure with proper skin care results in making and keeping your skin soft, subtle and beautiful.

What Are The Risks?

All natural products are used in the process, and there are no long term risks. A slight redness of the skin may be present for 1-2 days after the procedure due to increased blood flow and renewing skin. Discuss any allergies with the cosmetologist prior to the procedure being undertaken.
